

Wound Ostomy Continence Institute

Institut d'enseignement en plaies, stomies et continence

Wound Ostomy Continence Education Program (WOC-EP) Overview

Ostomy Management (120 hours) Course number woc-ep001	Continence Management (120 hours) Course number woc-ep002	Wound Management (130 hours) Course number woc-ep003
<p>Description :</p> <ul style="list-style-type: none"> - 16 weeks (plus 2 weeks or 75 hours of preceptorship) <p>Evaluation of theory:</p> <ul style="list-style-type: none"> - 3 individual assignments (32%) - 2 discussion forums (26%) - 1 final exam (10%) <p>Evaluation of the preceptorship:</p> <ul style="list-style-type: none"> - Clinical Evaluation grid completed by preceptor (10%) - Clinical Journal – reflective practice (10%) <p>The theory is worth 80% and the preceptorship is worth 20% of the final mark for the course</p>	<p>Description :</p> <ul style="list-style-type: none"> - 13 weeks (plus 2 weeks or 75 hours of preceptorship) <p>Evaluation of theory:</p> <ul style="list-style-type: none"> - 3 individual assignments (32%) - 2 discussion forums (26%) - 1 final exam (10%) <p>Evaluation of the preceptorship:</p> <ul style="list-style-type: none"> - Clinical Evaluation grid completed by preceptor (10%) - Clinical Journal – reflective practice (10%) <p>The theory is worth 80% and the preceptorship is worth 20% of the final mark for the course</p>	<p>Description :</p> <ul style="list-style-type: none"> - 16 weeks (plus 2 weeks or 75 hours of preceptorship) <p>Evaluation of theory:</p> <ul style="list-style-type: none"> - 3 individual assignments (32%) - 2 discussion forums (26%) - 1 final exam (10%) <p>Evaluation of the preceptorship:</p> <ul style="list-style-type: none"> - Clinical Evaluation grid completed by preceptor (10%) - Clinical Journal – reflective practice (10%) <p>The theory is worth 80% and the preceptorship is worth 20% of the final mark for the course</p>

The CNA WOCC(C) exam is the final exam for the WOC-EP. The exam is to be written within one year of completing the program. Students can sign up to write the exam immediately upon completing the wound management course. The WOC-EP will provide letters of completion to facilitate writing of the exam. Students must provide proof of exam registration in order to complete the program and graduate. Graduation certificates will not be provided without proof of exam registration. Note: The WOC-EP will not request proof of passing the exam.

A CNA certification prep course has been developed and is available to students upon completion of the course if required however, it is the believe of the WOC-EP that students will be well prepared to sit the exam. The current exam pass rate is 95%.

Ostomy Management (120 hours) Course number woc-ep001	Continence Management (120 hours) Course number woc-ep002	Wound Management (130 hours) Course number woc-ep003
Module 1 – General Principles <ul style="list-style-type: none"> - Gastrointestinal anatomy, physiology, pathophysiology and surgical procedures - Genitourinary anatomy, physiology, pathophysiology and surgical procedures - Reproductive anatomy -Integumentary system anatomy, physiology and pathophysiology 	Module 1 – Urinary Incontinence <ul style="list-style-type: none"> - Anatomy and physiology - Assessment of the patient with urinary incontinence - Stress urinary incontinence - Urge urinary incontinence - Acute and chronic urinary retention - Reflex urinary incontinence -Functional urinary incontinence 	Module 1 - Integumentary Assessment and Management <ul style="list-style-type: none"> -Anatomy and physiology -Patient Assessment -Skin Assessment and Management
Module 2 – Assessment	Module 2 – Fecal Incontinence	Module 2 - Wound Assessment
<ul style="list-style-type: none"> - Patient assessment Stoma and abdomen assessment Peristomal skin assessment 	<ul style="list-style-type: none"> - Anatomy and physiology - Assessment of the patient with fecal incontinence Management of fecal incontinence 	<ul style="list-style-type: none"> -Wound Assessment and Critical Cofactors -Wound Bed Preparation, Topical and Biophysical Technologies in Wound Management

		Module 3 - Lower Extremity Wound Etiologies
Module 3 – Management of the - ostomy, the peristomal skin, percutaneous tubes and fistulae - Containment products and application - Fecal and urinary diversions including sexual counseling - Fecal and urinary continent diversions - Fistula - Percutaneous Tubes Pediatrics		Lower Extremity Ulcers -Neuropathic Ulcers -Lymphedema
		Module 4 – Other Wound Etiologies
		Pressure Injuries -Intrinsic Diseases and Uncommon Wounds -Surgical Wounds -Traumatic Wounds -Burns -Malignant Wounds
